## Nylon Monofilament Filter Bag NMO

Monofilament Mesh is an extremely strong material with precise weaving to ensure consistent pore sizes. It is reusable in many applications. Nylon bag is affordable and reliable commonly used filter bag to meet your general application.

- Micron ratings: 15um - 1200um
- Made of nylon 6 (PA6) monofilament through flat weaving & heat-setting treatment
- FDA compliance per 21 CFR 177, suitable for food & beverage application
- For high viscous liquids
- Check and measure pore size under 500 times microscope
- Ring material options: SS304 ring(A), steel with zinc coating ring(S), PE collar (H), PP collar (E), Nylon66 collar (N)

### Filter Bag Standard Sizes

Size No.	Diameter	Length	Flow Rate	Filter Area	Volume
# 01	182mm	420mm	20m <sup>3</sup> /h	0.25m <sup>2</sup>	8.0 L
# 02	182mm	810mm	40m <sup>3</sup> /h	0.50m <sup>2</sup>	17.0 L
# 03	105mm	235mm	6m <sup>3</sup> /h	0.09m <sup>2</sup>	1.30 L
# 04	105mm	385mm	12m <sup>3</sup> /h	0.16m <sup>2</sup>	2.50 L

Custom size also available upon request

## Filter Bag Ring Options

“S”  
Steel Ring (STD)

“A”  
Stainless steel Ring

“E”  
Polypropylene Ring

“H”  
Polyester Ring

“N”  
Nylon Ring
