Product News • Polypropylene Monofilament Filter Bag

产品信息 - 丙纶单丝过滤袋

- High performance on chemical corrosion resistance

- Be suitable for acid and alkali liquid filtration

(except concentrated nitric acid, concentrated caustic sodium)

- High strength, minor elongation
- Strong material with precise weaving to ensure consistent pore sizes
- Detection and measure pore size under 500 times microscope
- Broken test for each batch (standard $\geq 1.0\text{mpa}$)

- 丙纶单丝有较好的耐化学腐蚀性，对酸和碱抵抗性能良好

- 可过滤浓酸浓碱液体（除浓硝酸，浓的苛性钠外）
- 强力高，断伸小
- 经线纬线单丝编织，正方形网孔，热定型处理，孔径保证
- 显微镜下放大 500 倍检测孔径
- 每批做爆破测试（常规 $\geq 1.0\text{mpa}$ ）

- We have a wide choice of filter medium from 0.2 micron to 1,200 micron, different material composition likes PP, PE, Nylon, high efficiency series bag to ensure its Chemical compatibility.
- High quality control in our construction of filter bag ensure no fiber migration during filtration process and no contamination to your liquid.
- Best alternative substitute to Eaton, Hayward, GAF or LOEFFLER, FSI filter bag.
